

KASEY HINTON

I am a software engineer in Southern Utah. I currently focus on web and desktop development. I enjoy engineering projects from concept to delivery. I am driven and love pursuing new challenges.

EXPERIENCE

Leavitt Software Solutions, Cedar City — Software Engineer

September 2015 - PRESENT

Works as a full-stack software engineer on a production team building progressive web applications. Builds scalable and efficient software with web components and Google's Lit Element library.

PROJECTS

Leavitt Social — Polymer

An internal social media site for employees to collaborate. Employees can create groups, share files, access important directories, view profiles, and stay up to date with the latest news in the Leavitt Group.

The Technical Review — Gatsby, React

Created an online news journal covering the latest in technology news and products. thetechnicalreview.com

Leavitt Link — Lit Element

A collection of user-facing applications for obtaining small business, auto, home, and life insurance quotes. The applications have been designed so they can easily be skinned for re-use with third parties.

Denali Geology — React and Material UI

A site briefly describes the geological origins of Denali National Park and Preserve. denaligeology.com

Cedar City, UT 84721

435-494-3621
